CAYENNE MEDICAL APPOINTS RANDY BUNESS AS CHIEF FINANCIAL OFFICER

Scottsdale, AZ — April 26, 2010 — Cayenne Medical, Inc. (Cayenne), a privately held sports medicine device company, announced the appointment of Randy Buness as Chief Financial Officer, effective April 26, 2010. Mr. Buness, who will be responsible for all financial operations of the Company, brings more than 25 years of financial experience and results-oriented leadership.

“We are very pleased to welcome Randy as Cayenne’s Chief Financial Officer,” said James W. Hart, President and CEO of Cayenne Medical. “He is a talented finance professional with an impressive track record, and I am confident that his leadership will be a great addition to our management team.”

Prior to joining Cayenne, Mr. Buness served as Chief Financial Officer of multiple high-growth, public and private technology companies with annual sales up to \$250 million, including United Medical Network, a medical communications company that he co-founded and was subsequently acquired by Johnson and Johnson. Most recently, Mr. Buness served as Chief Financial Officer of Routecloud, LLC, a Scottsdale-based mobile phone application developer and provider.

Mr. Buness’ financial background includes expertise in venture capital, public stock offerings and mergers and acquisitions, including ten years in public accounting at Ernst & Young and PricewaterhouseCoopers. He graduated summa cum laude from Seattle University with a bachelor’s degree in business administration and accounting and earned his masters in business administration in international finance from Thunderbird School of Global Management.

Buness currently serves as a member of the American Institute of CPAs and Arizona Society of CPAs.

About Cayenne Medical, Inc.:

Based in Scottsdale, Arizona, Cayenne Medical is a privately held medical device company defining new technology for the soft tissue reconstruction segment of the sports medicine market. The company was founded in 2005 and is focused on leading the transformation of traditional ACL, PCL, and meniscal repair procedures, by applying advanced technology through minimally invasive techniques.
